

Iowa's Craft Beer Industry — 2016

As of 2016, Iowa is currently home to 70 breweries. The Brewers Association reports Iowa annually produces approximately 61,200 barrels of craft beer, or 0.9 gallons of beer per adult aged 21 years and older.

The production, marketing, and sale of “craft” or nontraditionally brewed beer has increased in popularity over the last several years. The number of craft breweries in Iowa has grown significantly over the past decades, especially between the years of 2009 and 2013.

For more information on background and historical information for Iowa's growing craft beer brewing industry, analysis of current production efforts, and reports on emerging trends, see the *Issue Review [Iowa's Craft Beer Industry](#)*.
